## WHAT THE CATALOG LISTS

- 12 ft container, 8 ft wide, standard height — the tight-site box
- Man door and one barred window on the long side, so it works as a walk-in tool crib
- Cargo doors on the end

## SITE AND ACCESS

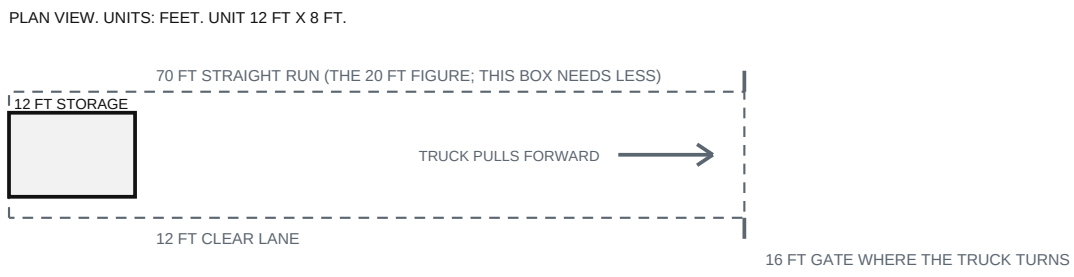

Less than the 70 ft of straight-line clearance a 20 ft unit needs (Rental Agreement §5.2). JOLT publishes no shorter figure, so this drawing plans 70 ft; the yard confirms your spot at reservation.

A clear lane at least 12 ft wide, and a 16 ft gate opening where the truck turns.

Overhead: keep branches, wires and headers well above 14 ft 6 in; the tilting bed rises higher while it sets the unit.

A firm, level, well-drained surface, with utilities located and marked (Rental Agreement §5.2).

## PLAN VIEW AND DELIVERY APPROACH (THE DXF AND SVG ARE DRAWN IN FEET)

Not on this sheet: weights. The yard confirms them for your job — (888) 638-5658 or 970-279-1015.
